

CS-UY 4613 – Artificial Intelligence: Project 2

The program for this project consists of 2 files: Backtrack.py and Board.py.

How to run the program:

1. Make sure Backtrack.py, Board.py, and input files are in the same directory
2. Open a terminal window and navigate to the directory containing the two files
3. Run the command “python Backtrack.py *<fileName>*”
 - a. *<fileName>* is the name of the input file to the program
4. Upon execution of the command, a view of the final board assignment will be printed in the terminal window with each of the 9 conventional boxes demarcated. The properly formatted output of the program is written to output.txt in the directory
